

Sinning Vermessungsbedarf

Sinning Vermessungsbedarf GmbH (Germany) offers high-precision instruments, as well as maintenance service and training. The company also designs individual system solutions for all survey projects, specifically in monitoring and track survey for the global market. This year the company is introducing

*GEDO CE VorSys
pre-measurement system.*

GEDO CE VorSys, its new pre-measurement system for tamp machines that enables users to work exclusively with reference points, helped by two measurement trolleys on the basis of a track-marking plan or digitally available track data. A variance comparison of the planned track course can be thus quickly and economically done.
